VF free recall scoring key

Count the # target words of each valence x font size combination that Pp correctly freely recalled. Enter the 6 values in the SPSS grid in the correct columns. For each valence x font size combination, the free recall score has possible range of 0-10. Make sure that you enter Pp's recall scores in the same row as their JOLs.

Count plurals as correct. Do not count synonyms as correct.

Cued recall scoring key

Score Pp's cued recall sheet 6 times – once for each valence x font size combination. Ex: Count the # target words correctly entered if pairs were negative & target words appeared in small font (NEG-SMALL). Count target words as correct only if they belong with cues. For each valence x font size combination, the cued recall score has possible range of 0-10. Make sure that you enter Pp's cued recall scores in the same row as their JOLs & free recall scores.
